- Turbochargers
- Injectors
- Woodward governors
- Flexible couplings
- Any other engine room component.

Please visit us or head over to our website at www.dieselenginespanama.com for more information.

DES Classifieds

- DES is always searching for new service staff to complement its already growing service departments. If you would like to join us please send your resume to : sales1@dieselenginespanama.com
- DES has hired 2 new Service Engineers to the group. One of the service engineers has an extensive background in electrical engineering.
- DES has hired new employees in which support the customer service and post sales departments.

DES Technicians resolve an emergency Service call of M/V Capricorn.

Our technicians went on an emergency service call for the M/V Capricorn. The incident occurred in Balboa, just a few minutes from our workshop, across the Panama Canal. Our technicians went onboard the vessel and found the origin of fault on the PGA Woodward main governor. Onboard they repaired the broken axis and found the reason of the problem. Our Technicians found irregularities on the adjustments between the gears that connect the motor with the governor.

DES only provides original parts from MAN DIESEL and guarantees all of its service

Diesel Engine Services is a Panamanian company with more than 4 years in the market. It is an Authorized Workshop in which represents Man Diesel parts and services. It is estimated that at least 50% of the vessels trading in our region carry a Man Diesel Engine, and 90% of the electricity in Panama is power generated by the German engine maker

MAN DIESEL. Our company only carries originals 4 stroke engine parts, and MAN turbocharger spares in our workshop facilities. We take pride in our representation while training, coaching, and developing the DES team. Our Service Engineers, Technicians, Mechanics, and Staff continuously find new ways to ensure our customers around the world receive the quality of work deserved from a MAN Authorized workshop in our region.

We are prepared to receive Maersk Malacca

In a few days DES will be receiving the vessel Maersk Malacca for an overhaul of the UG8 Woodward governor. Maersk Line Shipping once again considers our Woodward technical assistance in our region.
